This table represents all healthcare relationships of ERC members with industry and other entities that were reported by ERC members, including those not deemed to be relevant to this initiative, at the time this document was under development. The table does not necessarily reflect relationships with industry at the time of publication. A person is deemed to have a significant interest in a business if the interest represents ownership of  $\geq 5\%$  of the voting stock or share of the business entity, or ownership of  $\geq \$10,000$  of the fair market value of the business entity; or if funds received by the person from the business entity exceed 5% of the person's gross income for the previous year. Relationships that exist with no financial benefit are also included for the purpose of transparency. Relationships in this table are modest unless otherwise noted. Please refer to <http://www.cardiosource.org/Science-And-Quality/Practice-Guidelines-and-Quality-Standards/Relationships-With-Industry-Policy.aspx> for definitions of disclosure categories or additional information about the ACC/AHA Disclosure Policy for Writing Initiatives.

\*Significant relationship.

†No financial benefit.

AAAH indicates Accreditation Association for Ambulatory Health Care; ACC, American College of Cardiology; AHA, American Heart Association; DSMB, data safety monitoring board; ERC, Evidence Review Committee; NIH, National Institutes of Health; UCSF, University of California, San Francisco; and VA, Veterans Affairs.
